Signature Information

By checking the box below, I affirm that my application is true, complete, and accurate to the best of my knowledge and belief. I acknowledge that the Washington State University (WSU) Standards of Conduct for Students apply from the time I submit my application for admission. I acknowledge that misinformation, misrepresentation, or omission of information as well as the submission of any materials that are incomplete, forged, fraudulent, misleading, altered from the original, or obtained under false pretenses violate the WSU Standards of Conduct for Students and may result in sanctions, including but not limited to: denial of enrollment, revocation of admission and any financial offers, denial of transfer credits, expulsion, and/or revocation of a degree awarded from WSU. I hereby authorize WSU to verify with appropriate entities that the information contained within this application is true, accurate, and complete. I hereby authorize other educational institutions or agencies to release all of my education records (including but not limited to records pertaining to my academic history, student conduct, and any and all disciplinary matters) to WSU to enable the university to evaluate my application for admission. I agree to abide by the standards, rules, policies and procedures of WSU, the Graduate School, and the Program.

Statement of Purpose

I began my story with challenges when I studied in an exclusive secondary school, which was chock-full with talented students. Now I am graduating and completing my MSc in Mechanical and Aerospace Engineering at the University of Dayton, which has a unique opportunity in Engineering fields. It is time to pursue a new story with challenges of this sort by opting to get a Ph.D. in mechanical engineering from a distinguished American University.

Once I received the bachelor degree, I applied to work as a practical lecturer in a private university - software department for two years. That implied numerous association in my basic coding and advanced web browsing lead me to affluence in the master degree to accelerate my thesis work in energy prediction to finish it in only two semesters.

It is the time to improve my skills by more contribution in solving real-world problems by pursuing a Ph.D. degree. This degree will give me a big lot of academic experience that will help me to be a dependent researcher and more contribute to others.

Washington State University offers an exceptionally program that is engaged on Mechanical Engineering, with an emphasis on Micro and Nanotechnology. For instance, one of the outstanding professors is M. Grant Norton who has been taking care of issues connected with Nanotechnology and Clean Technology. Joining to WSU will enable me to be involved in simulation and design and keep tracking the modern technology.
